MBS 3A8

PRICE: $50

DECEMBER 3, 2002

103-03022/

INTRODUCTION:

The Manitoba Bureau of Statistics (MBS) has prepared this report as part of its economic statistics program. The purpose is to provide information for Manitoba on the importance and impact of international merchandise trade.

This publication provides merchandise export and import statistics by country, country grouping, commodity and industry. The information is from Statistics Canada's International Trade Division.

MBS adjusts the value of exports for some commodities in its Manitoba Economic Accounts. These adjustments are undertaken to better reflect the value of the foreign export of these commodities to the provincial economy.

Users should be aware that the export data is on a "province of origin" basis, while the import data is on a "province of clearance" basis. Therefore, imports from other countries are not counted if they are cleared through custom ports in other provinces and then shipped to Manitoba (MBS would count these as interprovincial imports). This implies that the trade balances calculated for individual countries could overstate Manitoba's actual position.

All commodity data presented in this report are based on the 4-digit level Harmonized System (HS).

The Manitoba Bureau of Statistics has available additional detailed information, which can be supplied to interested users on a cost recovery basis. Export/Import information that can be provided includes:

i) individual commodities for specific countries
ii) individual commodities by country (volume and dollar value) at the 4, 6, 8, or 10 digit HS level
iii) commodities by country for specific industries or sectors.

For answers or further information, please contact Marcel Chartier at (204) 945-2991.

NOTE TO USERS:

The data presented in this report has been derived from the most current estimates released by Statistics Canada's International Trade Division. For the first nine months of 2001 and 2002, MBS has made a reduction of $126.3 and $1,019.5 million respectively to aircraft imports from France to better reflect Manitoba's true share of these imports that are used throughout Canada.

Also included in this report are four historical tables (Tables 11(a & b) and 12(a & b)). They provide the current export data by selected country and industry for the years 1998 to 2001.

It is to be noted that revisions to previous year's data (2001) now occur on a quarterly basis. This results in an increase of $0.4 million between the current and the previous estimates of total export numbers for the 2001 calendar year.

MANITOBA TRADE UPDATE

FOURTH QUARTER, 2002

MANITOBA
BUREAU OF STATISTICS

RIGHT ANSWERS
RIGHT NOW

MBS 3A8

PRICE: $50

MARCH 3, 2003

INTRODUCTION:

The Manitoba Bureau of Statistics (MBS) has prepared this report as part of its economic statistics program. The purpose is to provide information for Manitoba on the importance and impact of international merchandise trade.

This publication provides merchandise export and import statistics by country, country grouping, commodity and industry. The information is from Statistics Canada's International Trade Division.

MBS adjusts the value of exports for some commodities in its Manitoba Economic Accounts. These adjustments are undertaken to better reflect the value of the foreign export of these commodities to the provincial economy.

Users should be aware that the export data is on a "province of origin" basis, while the import data is on a "province of clearance" basis. Therefore, imports from other countries are not counted if they are cleared through custom ports in other provinces and then shipped to Manitoba (MBS would count these as interprovincial imports). This implies that the trade balances calculated for individual countries could overstate Manitoba's actual position.

All commodity data presented in this report are based on the 4-digit level Harmonized System (HS).

The Manitoba Bureau of Statistics has available additional detailed information, which can be supplied to interested users on a cost recovery basis. Export/Import information that can be provided includes:

i) individual commodities for specific countries
ii) individual commodities by country (volume and dollar value) at the 4, 6, 8, or 10 digit HS level
iii) commodities by country for specific industries or sectors.

For answers or further information, please contact Marcel Chartier at (204) 945-2991.

NOTE TO USERS:

The data presented in this report has been derived from the most current estimates released by Statistics Canada's International Trade Division. For the 2001 and 2002 calendar years, MBS has made a reduction of $534.0 and $1,195.4 million respectively to aircraft imports from France to better reflect Manitoba's true share of these imports that are used throughout Canada. Because of provincial distribution problems emanating from the Statistics Canada data, MBS has estimated electricity exports to the United States for October 2002 at $29.0 million.

This report includes four historical tables (Tables 11(a & b) and 12(a & b)). They provide the current export data by selected country and industry for the years 1999 to 2002.

It is to be noted that revisions to previous year's data (2001) now occur on a quarterly basis. This results in an increase of $261.7 million between the current and the previous estimates of total export numbers for the 2001 calendar year. The revisions were primarily in grain and oil seeds commodities and electricity.
